1. Applicant has not given a post office address anywhere in the application papers as required by 37 CFR 1.33(a), which was in effect at the time of filing of the oath or declaration. A statement over applicant's signature providing a complete post office address is required.

- 2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There doesn't appear to be any antecedent for a radius being between about 0.45 inch and about 0.53 inch and a height at about 0,0033 inch as claimed in claim 3. Furthermore there doesn't appear to be any antecedent for a radius being about 0.5 inch as claimed in claim 4.
- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3 and 4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants are advised that the limitations for the radius and height mentioned above disagree with those set forth on pages 4and 6 by what appears to be a factor of 10. It isn't clear therefore which figures are correct, those described the specification or those claimed in claims 3 and 4.

Application/Control Number: 10/612,867 Page 3

Art Unit: 3727

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4 are rejected under 35 USC 103 (a) as being unpatentable over

Hoffman

Hoffman teaches a finish ring for a container at 5 which includes a locking ring

portion for a crown cap 6.Th ring has a smooth transition without any abrupt features

from the convex curves to the concave curve, as claimed. Any particular difference in

height or radius is considered to be an obvious difference dependent in part on the

material and type of cap used with the container.

5. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. The patents show other locking rings

6. The following are suggested formats for either a Certificate of Mailing or

Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course

of business by another no later than the date indicated.

**Certificate of Mailing** 

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to:
